SKILL

- Backend JS frameworks(Nest,...)
- Performance Optimization
- Version Control
- Docker
- Linux

Education

Shahid Beheshti University

Bachelor's degree, Industrial Safety

Dec 2017 - Dec 2021

INTERESTS

- Container Orchestration
- Web3 Technologies
- Continuous Learning

HOBBIES

- Solving Rubik'sCube
- Board Games
- Dealing with Math Problems

Summary

Seasoned Backend Engineer adept at designing and implementing **scalable** server **architectures**. Skilled in **Node Js**, database management, and **API development** to ensure optimal **performance** and reliability. A results-oriented professional committed to delivering efficient backend solutions for complex applications.

EXPERIENCES

Software Engineer at Tezuka.io
Dec 2022 - Mar 2023

I was the Software engineer of a large NFT marketplace to collect, and sell digital items on Blockchain networks.

- Developed and maintained scalable web applications using **Node.js,** Express.js and **PostgreSQL** ensuring optimal performance and responsiveness.
- Designed and implemented **RESTful APIs**, incorporating best practices for **authentication** and **authorization** with **Metamask**. This enhanced the security and reliability of the applications

Career break
Dec 2021- Oct 2023

- Military Service

Software Enginner at Piltonet.com
Feb 2021 - Sep 2021

A **P2P lending** platform which was meant to decentralize lending using **Stellar Network**.

- Utilized **Node.JS/MongoDB** to architect and manage database systems, optimizing queries and improving database performance.
- Collaborated closely in **DevOps**, to implement a robust monitoring and logging system, proactively identifying and resolving issues before they impacted end-users.
